HEALTHWAYS FACILITIES

Healthways Warehouses

HEALTHWAYS four strategically located factory facilities provide the most expeditious service throughout the western hemisphere. Los Angeles, California to service the western states; Chicago, Illinois to service the midwest; Pennsauken, New Jersey to service the east coast, and Toronto, Ontario to service Canada. Hamburg, Germany to service Western Europe and Melbourne, Australia to service the Far East. Outstanding product lines from a single source with liberal freight allowances program and consolidated shipments.

HEALTHWAYS assists you with unparalleled dealer support by national advertising, radio, television, point-of-purchase displays and advertising materials. HEALTHWAYS products are presented in inviting packaging, which has been awarded many national prizes.

DIVE MASKS

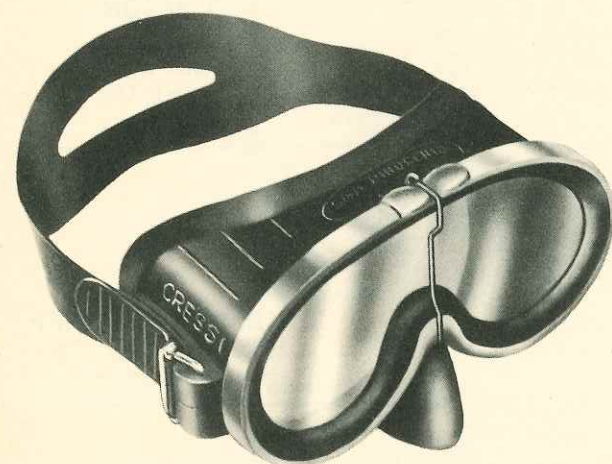

Cat. No. 1239
OSTRICA JUNIOR
Retail \$3.95

The only professionally designed, high quality mask for smaller faces. The Ostrica Junior and Ostrica Bantam are made of yellow rubber and equipped with "Lens-Lock" band and tempered glass safety lens.

Cat. No. 1240
OSTRICA BANTAM
Retail \$3.50

Cat. No. 1243
THE PINOCCHIO PROFESSIONAL "MODEL 1962"
PROFESSIONAL BLACK NEOPRENE
Retail \$8.95

The most successful of any mask, now made of black neoprene rubber which resists aging and is impervious to salt water and the elements. Accepted and used by Underwater Demolition Teams everywhere and by the world's leading professional and sport divers. Because of minimum air displacement, the Pinocchio Mask will provide up to 25% greater diving depth. The nose design allows easy and efficient compensation of underwater pressure on the ears. The tempered glass safety lens with the chrome plated brass "Lens-Lock" band is positioned to provide the fullest panoramic vision. The double feather edge insures an absolute leak proof seal.

Cat. No. 1244
THE PINOCCHIO "CLEAR-EASE"
PROFESSIONAL BLACK NEOPRENE
Retail \$10.95

Egidio Cressi, the world's foremost designer of underwater equipment, has now created the most superb of all diving masks by adding to the existing outstanding features of the already proven Pinocchio Mask, the "Clear-Ease" water purging valve.

Up to 25% greater diving depth because of minimum air displacement. Nose design provides easy and efficient compensation of water pressure on the ears and contains "Clear-Ease" water purging valve.

Double feather edge insures an absolute leak proof seal.

Tempered glass safety lens.
Chrome plated brass "Lens-Lock" band.

Black Neoprene rubber which resists aging and is impervious to salt water and the elements.

DIVE MASKS

Healthways presents the original designs in masks that lead the field in style, construction and performance. Created by Peche-Sport, Marseilles, France, the originators of the Panoramic and compensating features.

The ESPADON

Cat. No. 1220
ESPADON
FRENCH BLUE
Retail \$3.95

Cat. No. 1250
ESPADON
YELLOW
Retail \$3.95

Cat. No. 1270
ESPADON
PROFESSIONAL BLACK
Retail \$3.95

A high quality professional mask designed primarily for smaller faces. The Espadon features light weight construction with a comfortable feather edge fit. French blue, yellow or professional black rubber, "Lens-Lock" band and tempered glass safety lens.

The PANORAMIQUE

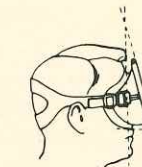

Cat. No. 1222
PANORAMIQUE
"WIDE-ANGLE"
FRENCH BLUE
Retail \$4.95

Cat. No. 1252
PANORAMIQUE
"WIDE-ANGLE"
YELLOW
Retail \$4.95

Cat. No. 1272
PANORAMIQUE
"WIDE-ANGLE"
PROFESSIONAL BLACK
Retail \$4.95

The exclusive design of The Panoramique "Wide-Angle," the world's most popular mask, brings the tempered safety glass lens closer to the eyes at a slant that offers undistorted vision over a wider range. The contour strap and feather edge of the mask make a comfortable, watertight fit. French Blue, Yellow or Professional Black rubber, stainless steel "Lens-Lock" band and tempered glass safety lens.

The COMPENSATOR[®]

Cat. No. 1223
COMPENSATOR
FRENCH BLUE
Retail \$5.95

Cat. No. 1253
COMPENSATOR
YELLOW
Retail \$5.95

Cat. No. 1273
COMPENSATOR
PROFESSIONAL BLACK
Retail \$5.95

Combining the outstanding features of all the world famous French Masks, The Compensator with its feather edge seal offers a perfect fit, the wide angle vision of the Panoramique, PLUS the exclusive finger wells that provide an easy grasp of the nose to compensate water pressure on the ears. French Blue, Yellow and Professional Black rubber, stainless steel "Lens-Lock" band and tempered glass safety lens.

DIVE MASKS with "CLEAR EASE" VALVE

The PANORAMIQUE Clear-Ease

Pat. Pending

Cat. No. 1224
PANORAMIQUE "CLEAR-EASE"
FRENCH BLUE
Retail \$5.95

The exclusive design of the Panoramique "Wide-Angle" with the proven "Clear-Ease" water purging valve, brings the tempered glass safety lens closer to the eyes at a slant that offers undistorted vision over a wider range. The contour strap and feather edge seal of the mask make a comfortable fit. French Blue rubber, stainless steel "Lens-Lock" band and tempered glass safety lens.

The STABILIZATOR Clear-Ease

®

A.S.F.A.C.E.M. product

Pat. Pending

Cat. No. 1261
STABILIZATOR "CLEAR-EASE"
PROFESSIONAL BLACK
Retail \$6.95

Another Healthways original from the developers of the world's most successful masks.

Simplicity, efficiency and absolute safety are the outstanding features of The Stabilizator Mask. Combines the Healthways original pressure compensation finger wells and the absolutely foolproof non-return valve to clear your mask.

The SQUALE Clear-Ease

®

Pat. Pending

Cat. No. 1226
SQUALE "CLEAR-EASE"
PROFESSIONAL BLACK
Retail \$5.95

The famous Squal Mask is now made of a special Black rubber compound and is equipped with the efficient "Clear-Ease" water purging valve. The Squal Mask features stainless steel "Lens-Lock" band, tempered glass safety lens and a superb feather edge seal.

See page 53 for Mask replacement parts

DIVE MASKS

The SQUALE

®

Cat. No. 1225
SQUALE
PROFESSIONAL BLACK
Retail \$4.95

The famous Squal Mask is now made of a special Black rubber compound. The Squal Mask features stainless steel "Lens-Lock" band, tempered glass safety lens and a superb feather edge seal.

Cat. No. 1201
AQUA CHAMP SPECIAL
BLUE
Retail \$1.00

This popular junior mask is a well fitting, quality blue rubber mask with exclusive bend-edge design and clear styrene lens.

Cat. No. 1202
AQUA CHAMP SENIOR
BLUE
Retail \$1.50

Leading in popularity, this well fitting round mask features quality blue rubber with a clear, round shatterproof lens.

The PROFESSIONAL

Cat. No. 1211
PROFESSIONAL DELUXE
AMBER GUM RUBBER
Retail \$3.95

The Professional Mask with double strength glass lens offers extra-heavy duty construction in Amber Gum rubber that guarantees maximum comfort and seal.

RONDINE FINS

Created by the most renowned manufacturer of underwater sports equipment, the Cressi Rondine fins have worldwide acceptance as the finest in design, construction, fit and performance. Cressi Rondine fins are the most copied but never duplicated fins in the entire history of underwater sports.

The RONDINE Junior

U. S. Patent No. 2737668

BLUE		
Cat. No.	Shoe Size	Retail
1373	2 - 3	\$5.95
1374	3 - 4	5.95
1375	4 - 5	5.95

These professional type fins were especially created for young people. Exceptionally light weight and comfortable in blue rubber.

The RONDINE Adjustable

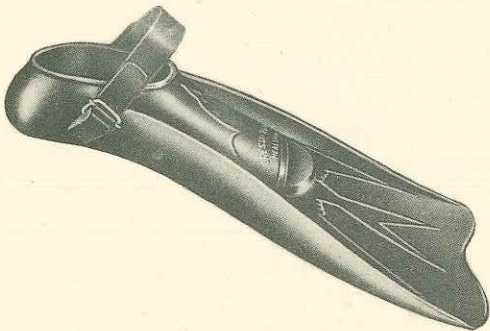

U. S. Patent No. 2737668

Cat. No.	Shoe Size	Retail
1381	1 - 5 (Small)	\$5.95
1382	5 - 10 (Medium)	5.95
1383	10 - 14 (Large)	5.95

The new Cressi Rondine Adjustable fin was created for the discriminating diver who prefers an adjustable strap. The comfortable contoured strap and the safety locking buckle plus the exclusive Cressi Rondine fin blade design make this the finest adjustable fin in the world.

The GENOA

U. S. Patent No. 2737668

See Page 53 for Fin Replacement Parts

PROFESSIONAL BLACK		
Cat. No.	Shoe Size	Retail
1330	5 - 7 (without strap)	\$7.95
1331	7 - 9 (without strap)	7.95
1334	9 - 11 (with adjustable strap)	9.95
1335	11 - 13 (with adjustable strap)	9.95

The original black rubber fin that has become a world-wide leader in popularity. The Genoa is scientifically designed to provide the maximum propulsion from its fin tip and side rigidity and at the same time offer form fitting comfort.

RONDINE FINS

Created by the most renown manufacturer of underwater sports equipment, the Cressi Rondine fins have worldwide acceptance as the finest in design, construction, fit and performance. Cressi Rondine fins are the most copied but never duplicated fins in the entire history of underwater sports.

The MEDITERRANEAN

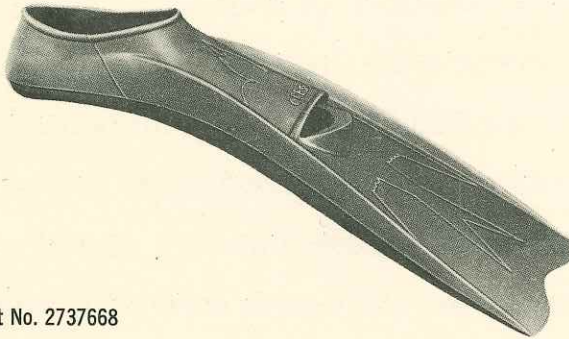

U. S. Patent No. 2737668

BLUE		
Cat. No.	Shoe Size	Retail
1350	5 - 7	\$10.95
1351	7 - 9	10.95
1352	9 - 11	10.95
1353	11 - 13	11.95

Made of Cressi floating blue rubber compound, combines the comfort, fin tip rigidity and lightness in weight desired by everyone.

The GARIBALDI

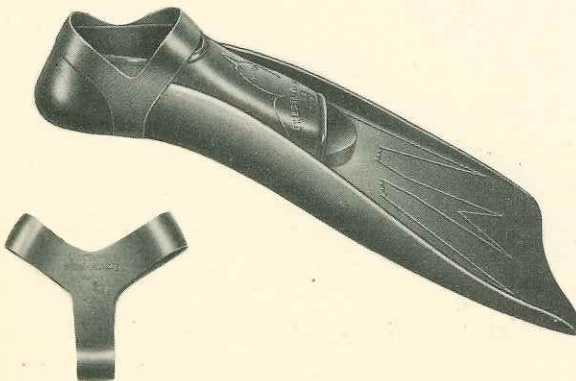

U. S. Patent No. 2737668

YELLOW		
Cat. No.	Shoe Size	Retail
1360	5 - 7	\$11.95
1361	7 - 9	11.95
1362	9 - 11	11.95
1363	11 - 13	11.95

This fin is made of a special floating compound yellow rubber which allows easy identification. Exceptionally light weight, with fin tip rigidity and all the advantages of the Cressi Rondine fin.

The COMPETITION

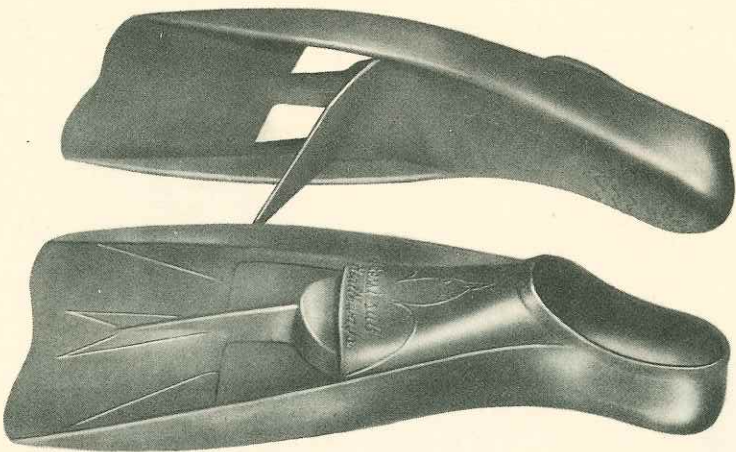

U. S. Patent No. 2737668

See Page 53 for Fin Replacement Parts

PROFESSIONAL BLACK		
Cat. No.	Shoe Size	Retail
1395	7 - 9	\$13.95
1396	9 - 11	13.95
1397	11 - 13	13.95
1398	13 - 16	13.95

The fin of world champions. Designed for maximum comfort, propulsion and durability. Used by Underwater demolition Teams throughout the world and by the leading professional and sport divers. Made of a combination of rubber textures which provide the famous foot comfort and fin tip rigidity desired by the experienced diver. Now equipped with the universal strap for absolute fin security under the most turbulent conditions.

RONDINE FINS

The SUPER RONDINE

NO.	SHOE SIZE	RETAIL
1390	5-7	\$14.95
1391	7-9	14.95
1392	9-11	14.95
1393	11-13	14.95

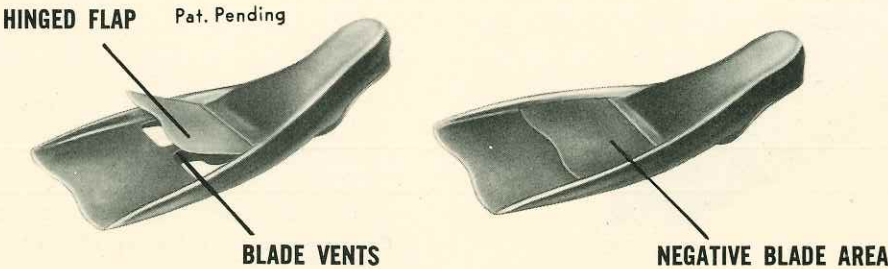

THE MISSING LINK IN UNDERWATER PROPULSION — GREATER PROPULSION WITH LESS EFFORT . . .

From the creator of the world's finest underwater sports equipment comes the all new **SUPER RONDINE** fin to add a new dimension in underwater propulsion.

SUPER RONDINE fin was presented to commemorate Cressi's 10th Anniversary of the day when the greatest innovation in diving... the Rondine fin... was introduced. The **SUPER RONDINE** fin transforms the usual negative blade area, common to all fins, into a positive thrust area, creating continuous propulsion on the downward as well as the upward thrust. This extra propulsion is obtained by two blade vents covered by a hinged flap, which shuts automatically on the upward thrust and opens on the downward thrust. As a result of this innovation the **SUPER RONDINE** fin provides increased propulsion with less effort. Made of Cressi Blue floating rubber.

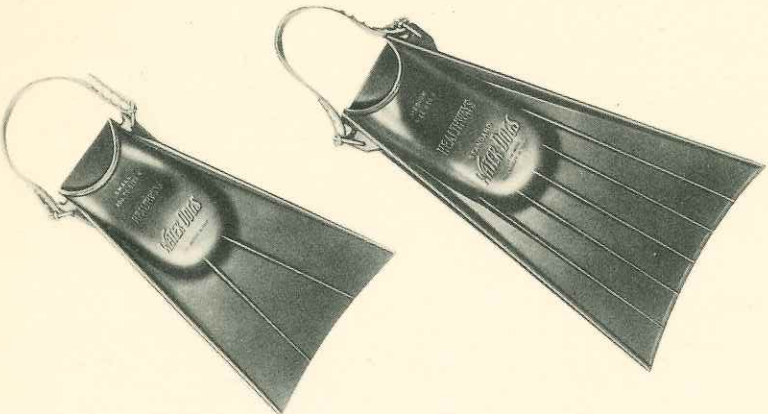

U. S. Patent No. 2737668

See page 53 for Fin replacement parts

FINS and ACCESSORIES

WATER DOGS

Cat. No.	Shoe Size	Retail
1302	Adjustable to size 6	\$2.95
1303	4 - 8	3.95
1304	8 - 13	3.95

Combining quality design and appearance, Healthways Water Dogs offer durability and lightness—an ideal all around fin with a fully adjustable non-slip safety buckle and strap. Molded of special compound blue rubber.

FIXE-PALME

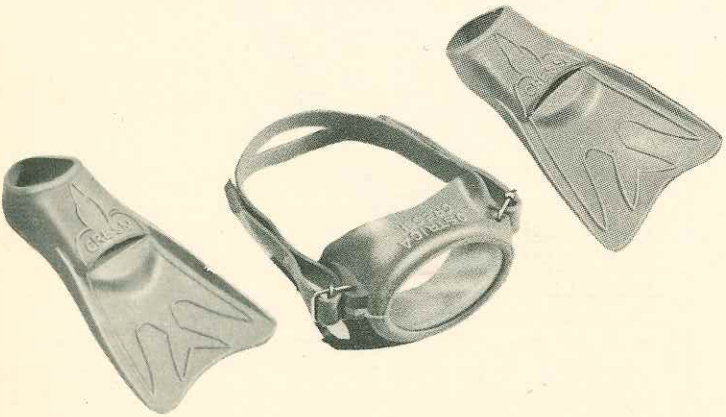

Pat. Pending
 See page 53 for Fin replacement parts

Cat. No.	Shoe Size	Retail
1370	7 - 11 (medium)	\$1.75
1371	9 - 16 (large)	1.75

A universal strap for absolute fin security. Holds any closed-heel type fin to your foot under the most turbulent conditions. The fin is held in three places—instep, arch and heel. Prevents heel of fin from slipping off.

The RONDINE Miniature

U. S. Patent No. 2737668

Cat. No. 1237
CRESSI MINIATURE RONDINE FINS AND MASK SET
 BLUE
 Retail \$.95

These detail scale miniatures of the real thing are much sought after momentos. A natural for premiums or promotions.

SNORKELS

**Cat. No. 1403
SEA SCOUT**
Retail \$1.00
Straight professional type snorkel of rigid polyethylene with a soft mouthpiece.

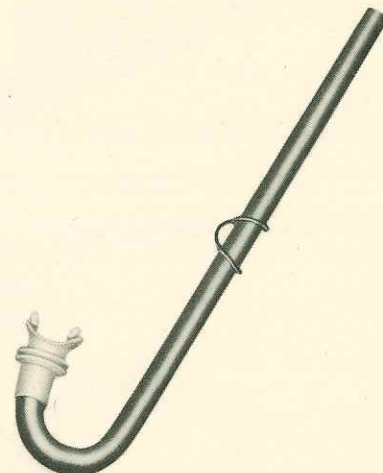

**Cat. No. 1405
SEA DIVE STANDARD**
Retail \$1.00
Cage and mouthpiece are molded of soft vinyl material.

**Cat. No. 1430
CRESSI DELFINO**
Retail \$1.95
Features one piece rubber elbow and mouthpiece, rigid blue elastic center pipe and a flexible upper section of black gum rubber.

See Page 53 for Snorkel Replacement Parts

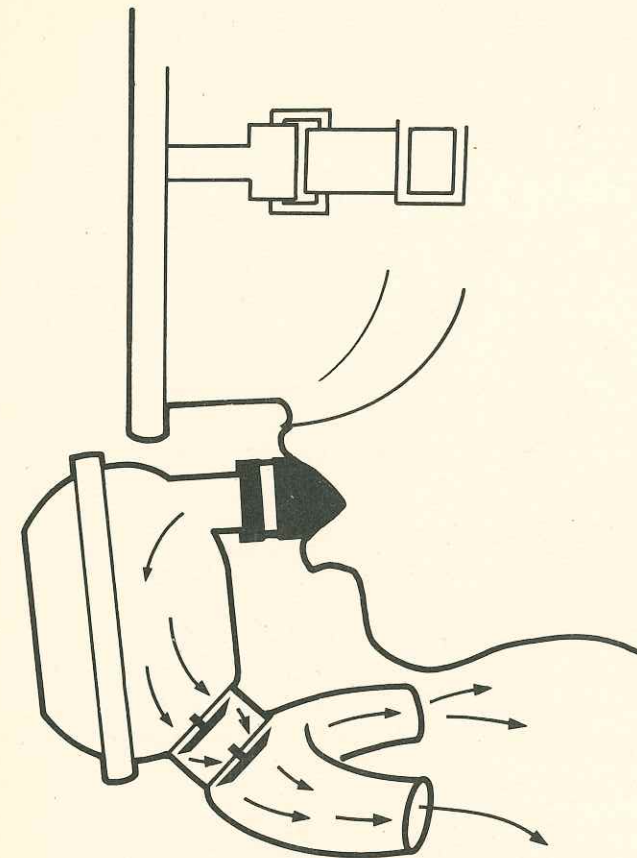

**Cat. No. 1432
HAITI PROFESSIONAL**
Retail \$1.95
The choice of professional divers in both style and construction, the Haiti Professional is made of the finest quality black rubber and equipped with Cat. No. 1432-07 Professional Snorkel Mouthpiece.

REGULATORS

THE SAFEST AND MOST EFFICIENT SECOND STAGE OF ANY SINGLE HOSE REGULATORS

A completely new and unique double exhaust valve which assures the diver of an absolute dry air supply under all conditions. A revolutionary new velocity air flow control—gives the diver “booster breathing” easily and comfortably at any depth. The second stage housing features a heavy chrome finish over brass and is impervious to salt water and the elements. Healthways original contoured air exhaust prevents air bubbles from obstructing vision. The well-proven “Quik-Klip” allows immediate removal of the cover to facilitate inspection and maintenance and insures a positive diaphragm seal. A swivel joint connects the high test nylon and neoprene hose to the second stage. All air connections have leak-proof “O” ring seals. A recessed snag-proof clearing button in the center of the second stage activating the diaphragm enables the diver to clear water from the unit instantly.

Pat. Pending

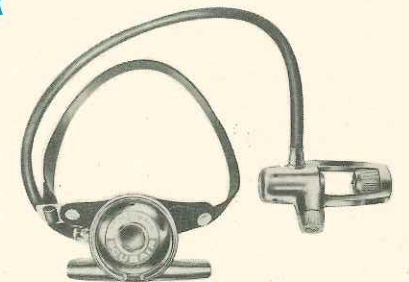

SCUBA-STAR

Cat. No. 1664
Retail \$32.50

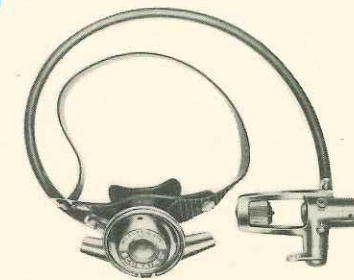

SCUBAIR

Cat. No. 1665
Retail \$42.50

SCUBAIR “J”

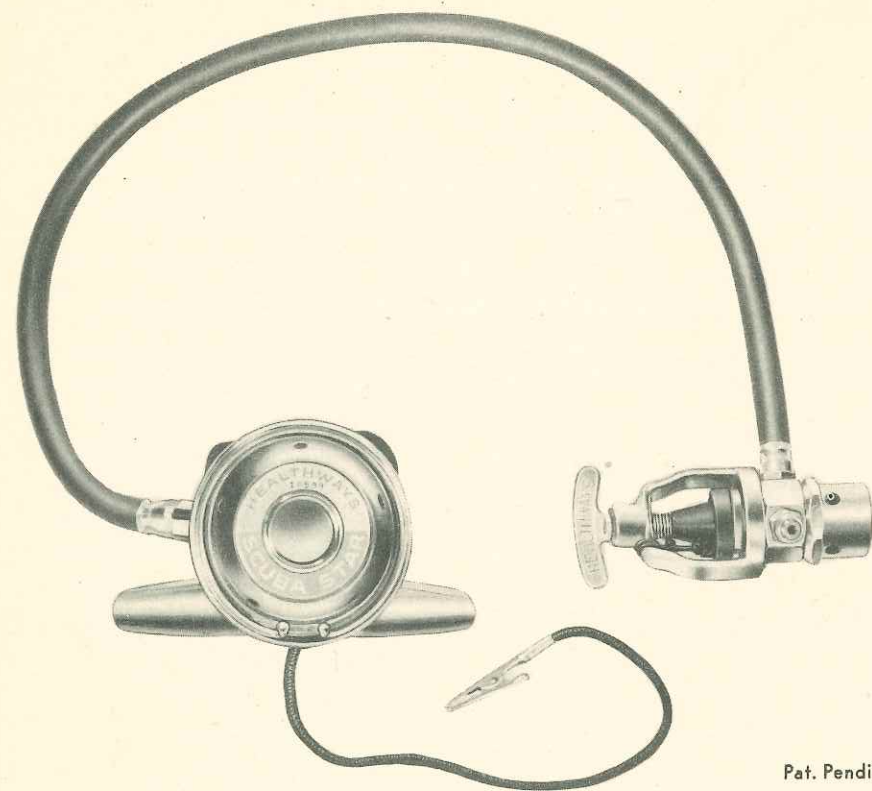

Cat. No. 1662
Retail \$62.50

SCUBAIR “300”

Cat. No. 1663
Retail \$72.50

Pat. Pending

Cat. No. 1664
SCUBA-STAR SINGLE HOSE
TWO STAGE REGULATOR
Retail \$32.50

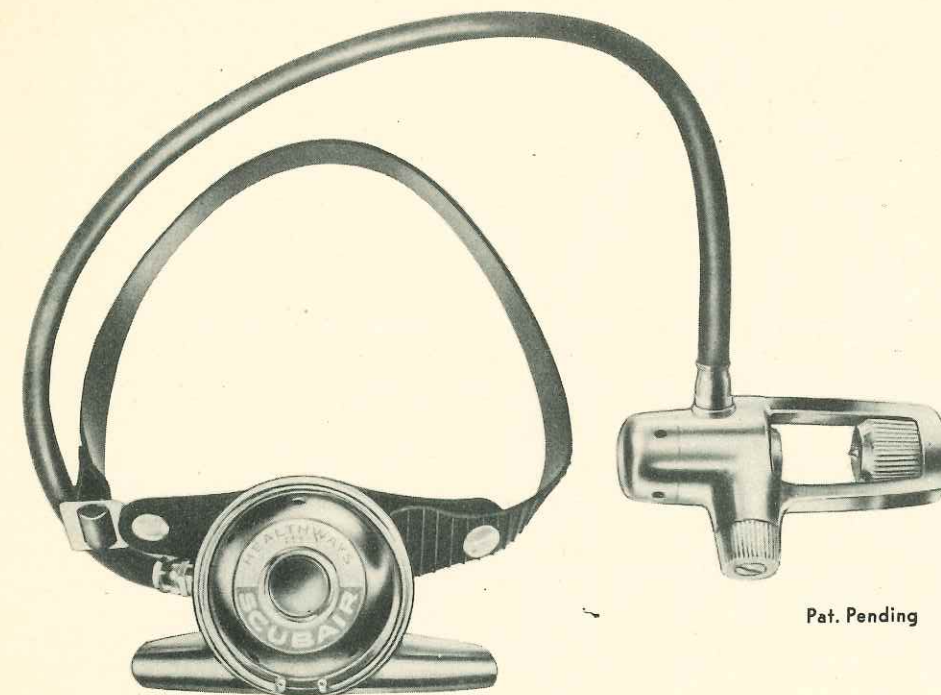

FIRST STAGE

The well-proven first stage with only one moving part and simplicity of operation and maintenance make the Scuba-Star the outstanding unit in its price class. A depth compensated automatic air reserve valve has been engineered into the first stage. All air connections have leak-proof "O" ring seals. A safety relief valve is incorporated into the first stage which eliminates the possibility of over-pressurizing the regulator. (This safety relief valve is sometimes referred to as a "third stage" in a two stage regulator.)

SECOND STAGE

A completely new and unique double exhaust valve which assures the diver of an absolute dry air supply under all conditions. The second stage housing features a heavy chrome finish over brass and is impervious to salt water and the elements. Healthways original contoured air exhaust prevents air bubbles from obstructing vision. The well-proven "Quik-Klip" allows immediate removal of the cover to facilitate inspection and maintenance and insures a positive diaphragm seal. A swivel joint connects the high test nylon and neoprene hose to the second stage. All air connections have leak-proof "O" ring seals. A recessed snag-proof clearing button in the center of the second stage activating the diaphragm enables the diver to clear water from the unit instantly.

See Page 39 & 40 for Replacement Parts

Pat. Pending

Cat. No. 1665
SCUBAIR SINGLE HOSE
TWO STAGE REGULATOR
Developed by Richard E. Anderson
Retail \$42.50

FIRST STAGE

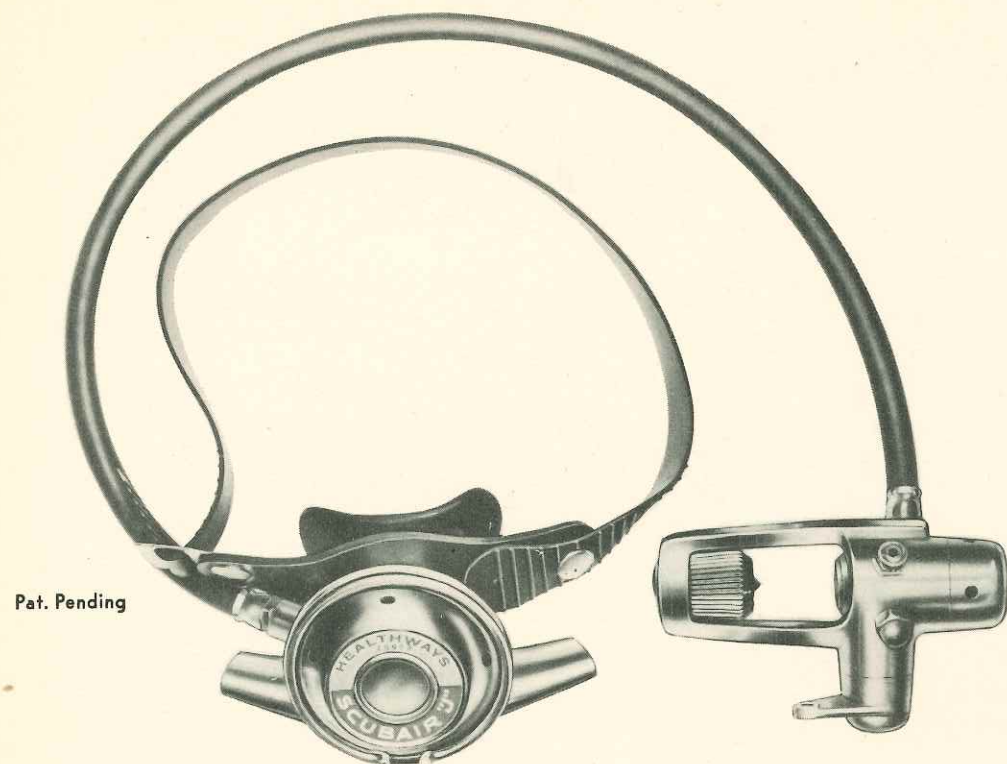

The Scubair regulator, the most widely acclaimed and accepted SCUBA in the history of self-contained diving, features the most efficient and functional design of any single hose regulator. A manually operated automatic air reserve control switch enables the diver to adjust his regulator for the automatic depth compensated reserve—or the "J restrictor" position when the regulator is to be used with a constant air reserve valve. An automatic depth compensated air reserve is activated by turning the external control wheel to the "K restrictor" position. This means instead of having to change the restrictors in the the high pressure block, this function can be performed simply with a twist of your fingers. The new internal yoke screw eliminates the conventional wing nut and provides an easily operated snag-proof means of attaching the regulator. Finger tip control is all that is necessary. The well-proven first stage with only one moving part and its simplicity all help to make the Scubair the safest and most functional SCUBA. It contains a high pressure plug which can be removed and the Submersible Scubair Gauge installed to enable the diver to know at all times how much air remains in the cylinder while diving.

SECOND STAGE

A completely new and unique double exhaust valve which assures the diver of an absolute dry air supply under all conditions. A completely new demand valve mechanism, engineered to deliver more air than any diving regulator available regardless of depth is incorporated into the second stage. A balanced venturi velocity air flow control—gives the diver "booster breathing" easily and comfortably at any depth. The second stage housing features a heavy chrome finish over brass and is impervious to salt water and the elements. Healthways original contoured air exhaust prevents air bubbles from obstructing vision. The well-proven "Quik-Klip" allows immediate removal of the cover to facilitate inspection and maintenance and insures a positive diaphragm seal. A swivel joint connects the high test nylon and neoprene hose to the second stage. All air connections have leak-proof "O" ring seals. A recessed snag-proof clearing button in the center of the second stage activating the diaphragm enables the diver to clear water from the unit instantly.

See Page 41 & 42 for Replacement Parts

SCUBAIR "J"

Pat. Pending

Cat. No. 1662
SCUBAIR "J" SINGLE HOSE
TWO STAGE REGULATOR
Retail \$62.50

FIRST STAGE

The Scubair "J" regulator features efficient and functional design. A manually operated constant air reserve valve is built into the first stage. This gives the diver the benefit of a 300 psi constant air reserve even though his cylinders are not equipped with reserve valves. The component parts of the reserve mechanism are interchangeable with Healthways' Professional Constant Air Reserve Valve. The new internal yoke screw eliminates the conventional wing nut and provides an easily operated snag-proof means of attaching the regulator. Finger tip control is all that is necessary. It contains a high pressure plug which can be removed and the Submersible Scub-Air Gauge installed to enable the diver to know at all times how much air remains in the cylinder while diving.

Cat. No. 1643 Pull Rod included

SECOND STAGE

A completely new and unique double exhaust valve which assures the diver of an absolute dry air supply under all conditions. A completely new demand valve mechanism, engineered to deliver more air than any diving regulator available regardless of depth is incorporated into the second stage. A balanced venturi velocity air flow control—gives the diver "booster breathing" easily and comfortably at any depth. The second stage housing features a heavy chrome finish over brass and is impervious to salt water and the elements. Healthways original contoured air exhaust prevents air bubbles from obstructing vision. The well-proven "Quik-Klip" allows immediate removal of the cover to facilitate inspection and maintenance and insures a positive diaphragm seal. A swivel joint connects the high test nylon and neoprene hose to the second stage. All air connections have leak-proof "O" ring seals. A recessed snag-proof clearing button in the center of the second stage activating the diaphragm enables the diver to clear water from the unit instantly.

SCUBAIR 300

With Sonic Reserve Warning

Pat. Pending

Cat. No. 1663
SCUBAIR "300" SINGLE HOSE
TWO STAGE REGULATOR
Retail \$72.50

FIRST STAGE

For the first time in the history of self-contained diving, a regulator features an alarm device indicating that the air supply in the tank has reached the minimum reserve level and that it is time to make a safe ascent. As soon as the air in the tank has been depleted to 300 psi, a clearly audible sonic alarm alerts the diver to the fact that his tank has reached the minimum safety level. Until all of the air has been exhausted, the alarm device continues to operate, reminding the diver that he is breathing reserve air. WITH THE SCUBAIR "300" THERE IS NO POSSIBILITY OF FORGETTING THIS VERY IMPORTANT AND LIFE—SAVING FACT.

The minimum safety level of 300 psi is approximately the same as in the Constant Air Reserve Valve ("J" Valve), but there is no necessity of manually switching over to reserve air. During each inhalation, the continuous loud clicking reminds the diver he is breathing reserve air.

The new internal yoke screw eliminates the conventional wing nut and provides an easily operated means of attaching the regulator. Finger tip control is all that is necessary. The Scubair "300" contains a high pressure plug which can be removed and the Submersible Scub-Air Gauge installed to enable the diver to know at all times how much air remains in the cylinder while diving.

See page 45 for replacement parts

SECOND STAGE

A completely new and unique double exhaust valve which assures the diver of an absolute dry air supply under all conditions. A completely new demand valve mechanism, engineered to deliver more air than any diving regulator available regardless of depth is incorporated into the second stage. A revolutionary new velocity air flow control (venturi action)—gives the diver "booster breathing" easily and comfortably at any depth.

The second stage housing features a heavy chrome finish over brass and is impervious to salt water and the elements. Healthways original contoured air exhaust prevents air bubbles from obstructing vision. The well-proven "Quik-Klip" allows immediate removal of the cover to facilitate inspection and maintenance and insures a positive diaphragm seal. A swivel joint connects the high test nylon and neoprene hose to the second stage. All air connections have leak-proof "O" ring seals. A recessed snag-proof clearing button in the center of the second stage activating the diaphragm enables the diver to clear water from the unit instantly.

Healthways

SCUBA DELUXE "MODEL 1962"

Cat. No. 1611
SCUBA DELUXE "MODEL 1962"
DOUBLE HOSE SINGLE STAGE REGULATOR
Retail \$52.50

Pat. Pending

The Scuba Deluxe "Model 1962" is the most popular and dependable regulator in its class. Every integral part of this unit has been precision made and engineered to insure maximum efficiency. Only the finest chrome plated stainless steel and brass materials have been used. No possibility of corrosion, electrolysis or other chemical action. A depth compensated air reserve has been engineered into the regulator. The Model 1962 Scuba Deluxe has a completely pressure-compensated exhaling valve that assures effortless equalized exhalation in any position. A new type neoprene high test air hose is being used.

See Page 47 for Replacement Parts

NEW FEATURES

- VENTURI MECHANISM:** Gives effortless breathing at any depth.
- INTERNAL YOKE:** The New internal yoke screw eliminates the conventional wing nut and provides an easily operated means of attaching the regulator. Finger tip control is all that is necessary.
- CASE AND COVER:** Locked together giving a more secure attachment and providing easier assembly.

HEAVIER CONSTRUCTION THROUGHOUT

UNCONDITIONAL TWO YEAR GUARANTEE

TWO YEAR UNCONDITIONAL GUARANTEE FOR ALL 1962 HEALTHWAYS REGULATORS — THE SCUBA-STAR, THE SCUBAIR, THE SCUBAIR "J", THE SCUBAIR "300" AND THE SCUBA DELUXE.

HEALTHWAYS is the only manufacturer of SCUBA equipment to offer unconditional guarantee against defects in material and workmanship for **TWO YEARS** from date of purchase. This **TWO YEAR** guarantee is proof of the superior quality of HEALTHWAYS products. HEALTHWAYS SCUBA equipment is the best that money can buy!

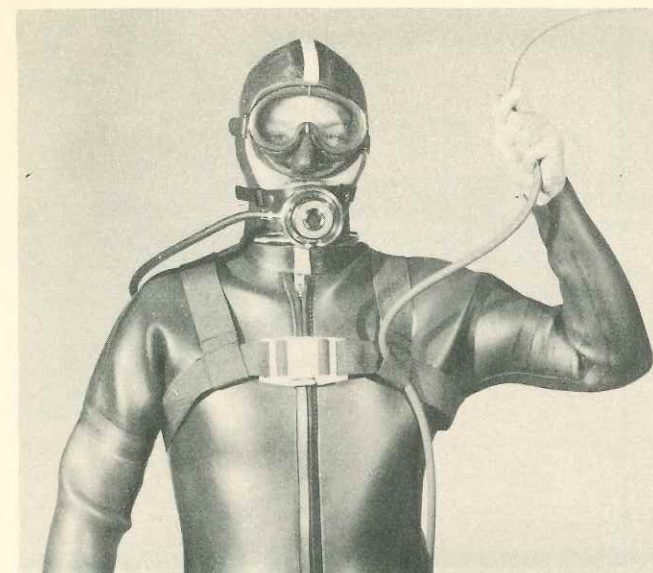

SCUBAIR HOOK-UP

Cat. No. 1689

**SCUBAIR SURFACE AIR
SUPPLY HOOK-UP**

Includes Second Stage of Scubair Regulator,
Harness, and Back Plate with Check Valve.

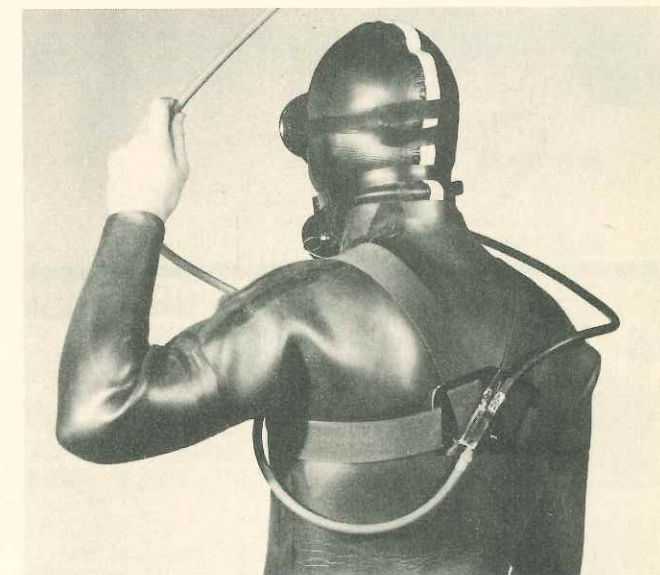

Retail \$48.00

FRONT VIEW

Featured with 2" nylon webbing which is laced in a manner that gives you complete freedom of movement, comfort and adjustability. The ends of the webbing are dipped in Healthways exclusive rubber compound to prevent fraying.

The harness is equipped with a newly designed nylon safety buckle.

BACK VIEW

The back plate is made from chrome plated, 1/16" sheet brass. The positive action check valve is silver braised directly on to the back plate before final plating. This insures that the check valve absolutely can not be torn loose from the back plate. This is important, because in most instances, the diver's air hose also serves as his life line. The check valve plays an important part, preventing the air in the diver's respiratory system from being forced back up the hose, should a rupture in the air hose occur at the surface. The check valve has a plug which can be easily removed for inspection and maintenance. Under the plug is a stainless steel spring and check ball. The inlet of the check valve has a standard 1/4" pipe thread which the diver can adapt to any hose connection he may desire to use.

SIDE VIEW

The surface air hose is brought under the left arm and through the front left webbing loop. This is to prevent a direct right angle pull against the check valve hose fitting, and also to keep the surface hose within reach of the diver for signalling. The Scubair "Hook-up" is completely independent of the weight belt.

Cat. No.	DESCRIPTION	Retail
1688	Surface Air "Hook-up" Harness.....	25.50
1688-02	Check Valve Complete	9.95

SCUBAPAK HARNESS

Cat. No. 1444
SCUBAPAK SINGLE
TANK HARNESS
Retail \$14.95
(Pat. Pend.)

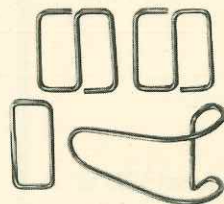

Cat. No. 1619
SCUBAPAK DOUBLE
TANK HARNESS
Retail \$16.50

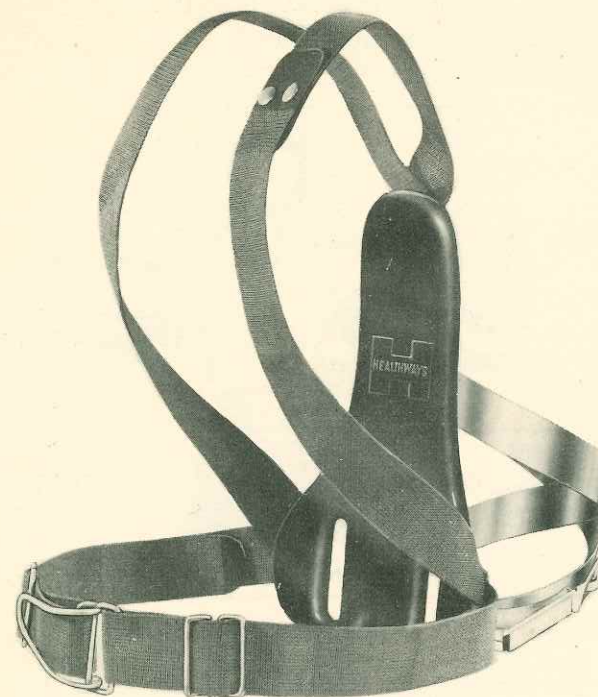

Completely new design by Richard E. Anderson that combines safety, comfort and utility. The SCUBAPAK is made of a single sheet of specially-compounded aluminum. A protective smooth surface coating of resilient high impact vinyl makes the back-plate impervious to salt water and the elements. The arrangement of the back plate puts the tank where it should be on the divers back. The ends of the nylon harness are dipped in Healthways special rubber compound to prevent fraying. The single tank harness features Healthways revolutionary new Stainless Steel "criss-cross" band design. This design provides

a more secure tank attachment than the conventional two parallel or single center band arrangement. The adjustable "criss-cross" design incorporates an instant action quick release latch, allows removal of the SCUBAPAK in seconds. Equipped with Healthways Jet-O-Sen quick release buckle, a crotch strap that may be used at the option of the diver, plus the quick button safety release on the shoulder strap. Two easy-to-carry handles, designed as an integral part of the harness, make carrying your SCUBA as easy as carrying a suitcase.

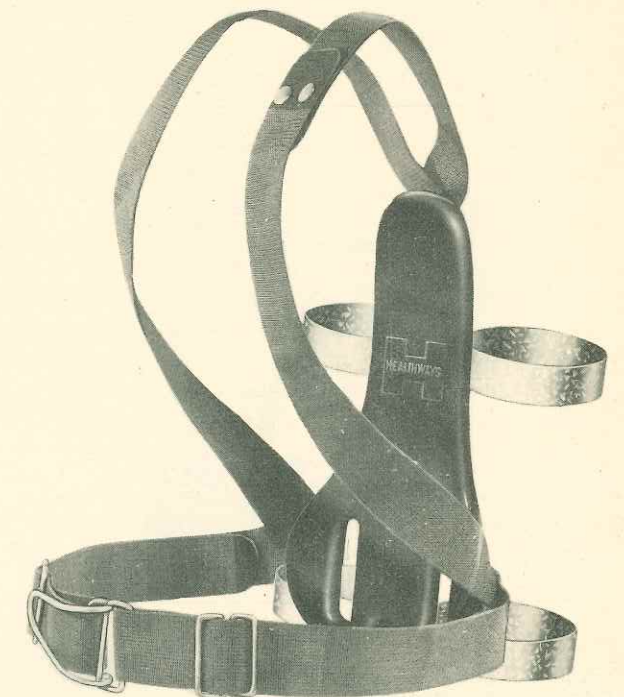

Cat. No. 1942-03
SCUBAPAK 2" SAFETY
BUCKLE ASSEMBLY
Stainless Steel—4 pcs.
(Fits 2" to 2 1/8" Web
Belts and Scuba harness)
Retail \$1.75

SCUBAPAK CONTOUR HARNESS

Cat. No. 1445
CONTOUR SCUBAPAK SINGLE
TANK HARNESS
Retail \$16.95

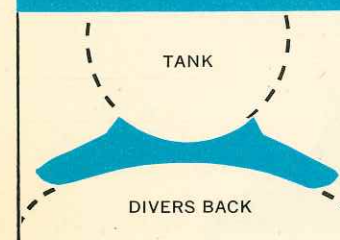

Cat. No. 1446
CONTOUR SCUBAPAK DOUBLE
TANK HARNESS
Retail \$18.50

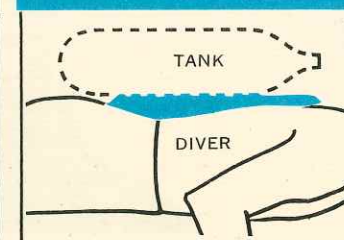

Healthways new Deluxe CONTOUR SCUBAPAK, incorporates all the outstanding features of the famous standard SCUBAPAK, nylon webbing, easy-to-carry handles, continuous strap arrangement and the Jet-O-Sen quick release safety buckle. These features are incorporated without adding unnecessary bulk to achieve what a contour pak is designed to do. The CONTOUR SCUBAPAK is designed to eliminate large gaps in the back plate and as a result is truly the most comfortable and form fitting

contour pak ever developed. The single tank harness features Healthways revolutionary new Stainless Steel "criss-cross" band design. This design provides a more secure tank attachment than the conventional two parallel or single center band arrangement. The adjustable "criss-cross" design incorporates an instant action quick release latch which allows removal of the CONTOUR SCUBAPAK in seconds.

PROFESSIONAL TANK VALVES

Healthways Professional Valves are specifically designed for SCUBA diving — The safest and most thoroughly engineered valves available — designed by professionals to meet the strict requirements of the discriminating diver. All Healthways Professional Valves contain an absolute fool proof safety plug. Healthways exclusively features a high-pressure outlet that is connected downstream of the shutoff — permitting the diver to remove the high pressure plug and install a Submersible Scub-Air Tank Pressure Gauge while the tank is full of air.

SCUBA AIR COMPRESSOR

Cat. No. 1997
7 HP Kohler Engine

Cat. No. 1998
3 HP General Electric Motor; 110 or 220 volts, Single Phase

Cat. No. 1999
3 HP General Electric Motor; 220 or 440 volts, 3 Phase

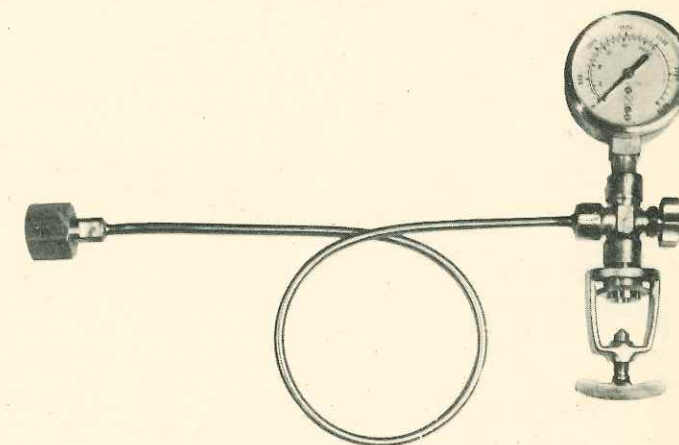

The Healthways Scuba Air Compressor has been developed after years of research and study and after thousands of hours of testing. The technical excellence, output and durability of the Scuba Air Compressor is incomparable. This unit will meet the most stringent requirements. It will fill a tank faster and safer than any other unit available of comparable size. The Scuba Air Compressor will fill a 71.2 cu. ft. tank from 0 to 2250 psi in approximately 13 minutes.

The Scuba Air Compressor is equipped with two safety devices on the high pressure system that are pre-set. One is the pressure-actuated cut off switch set at 2300 psi and the other is a pressure relief valve set at 2500 psi. It has two specially-designed filters: one for the first stage and another for the third stage. The compressor is mounted on a spring-loaded frame and weighs approximately 188 lbs.

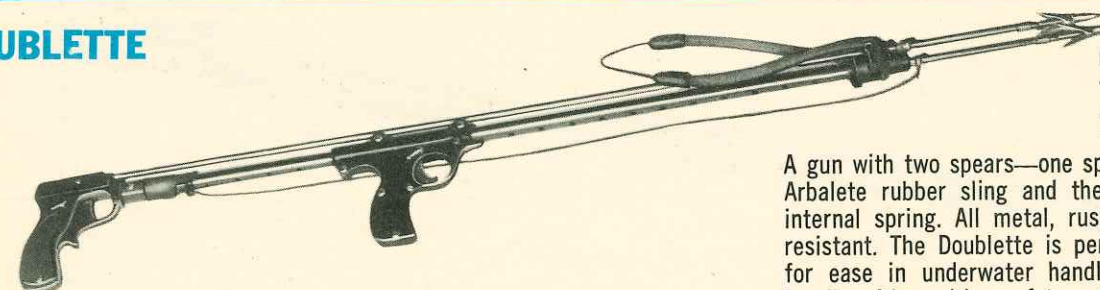

The Scuba Air Compressor is a 3-stage, 2000 rpm air compressor, driven by any of the three following power plants:

1. 7 HP Kohler reciprocating engine.
2. 3 HP General Electric Motor, 110 or 220 volts, single phase.
3. 3 HP General Electric Motor, 220 or 440 volts, 3-phase.

The DOUBLETTE

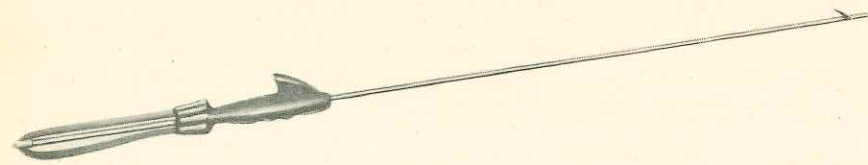

Cat. No. 1520
THE DOUBLETTE
Retail \$39.95

A gun with two spears—one spear powered by Arbalette rubber sling and the second by an internal spring. All metal, rust and corrosion resistant. The Doublette is perfectly balanced for ease in underwater handling. Pistol grip handle with positive safety catch for arbalette spear release. Center pistol grip with positive safety catch for spring powered spear release.

See page 52 for Replacement parts

SPEARFISHING GUNS

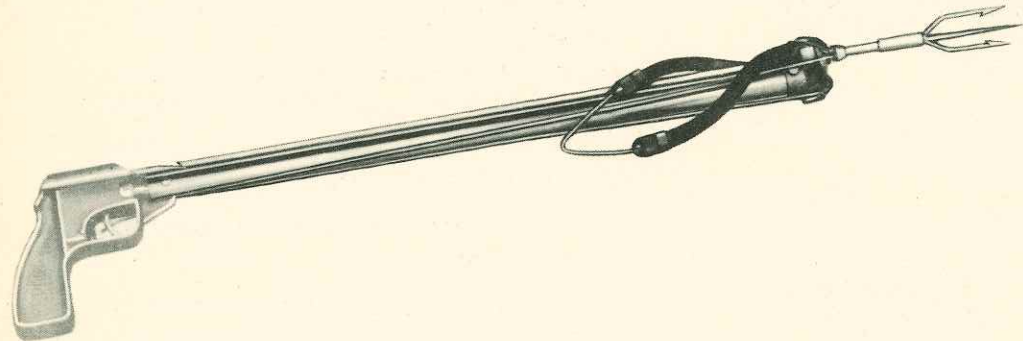

Cat. No. 1502
SHARK SLING SPEAR GUN
Retail \$4.95

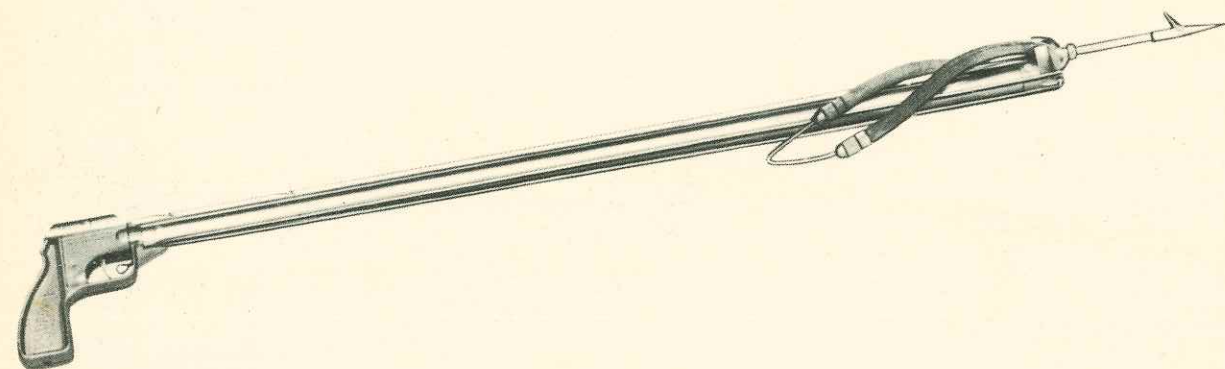

Modeled after the original Hawaiian design, used for centuries in the South Pacific. Fast, accurate and powerful. High impact styrene handle and 4 ft. plated spear. Non-slip, hand-fitting grip. This gun is ideal for close up work.

ESPADON ARBALETES

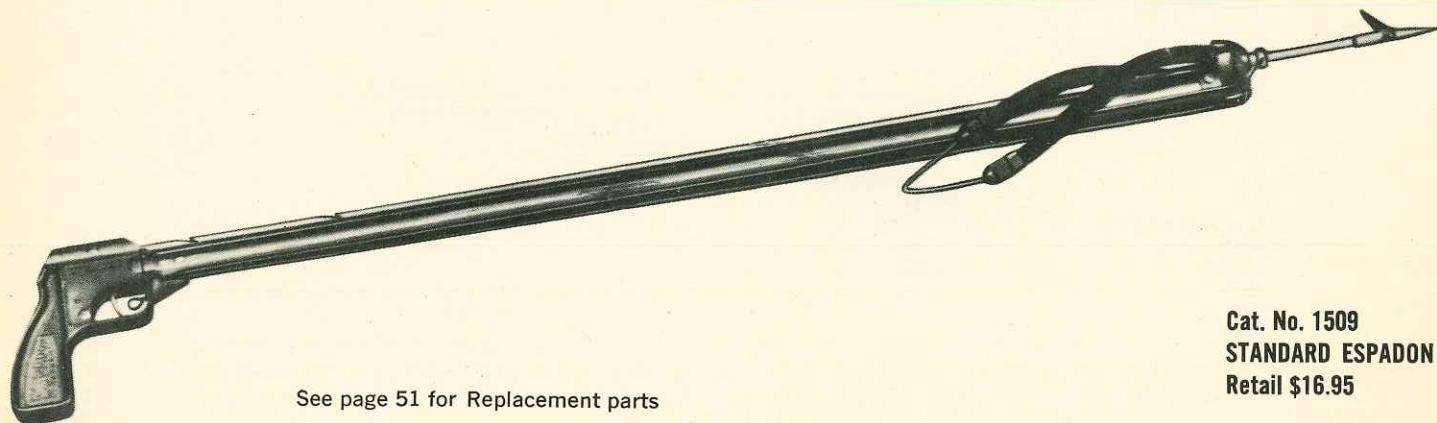

Developed by G. Beauchat, the originator of the arbalete, Espadon Arbaletes are dependable all-around spear fishing guns. Scientifically balanced and designed to float after release of the spear. The Espadon features improved hand-wrapped rubber power slings, tough plastic high impact handles with a positive safety lever and corrosion and rust resistant "Ocean Blue" finish.

WEIGHT BELTS

...A NEW CONCEPT IN WEIGHT BELTS

For the first time in the history of diving, a weight belt that actually "breathes" with the diver. The "Big Jim" weight belt expands and contracts with the diver's waist, even when the diving suit is compressed by water pressure at greater depths, and insures a comfortable fit at all times. The "Big Jim" weight belt has solved the problem of repeatedly having to correct adjustment to maintain a comfortable, snug fit. Made of Neoprene, the belt is easily adjusted through the black nylon safety buckle.

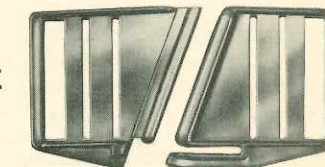

The new streamlined lead weight provides greater efficiency through less water resistance. The weights can be quickly added or removed without having to remove buckles (see diagram). A positive friction-lock keeps the weights positioned so they will not shift. The "Big Jim" Lead Weight Belt and Weights are interchangeable with Healthways Cat. No. 1942 Professional Lead Weight Belt and Weights.

Created by "Big Jim" Christiansen.

Cat. No. 1901
"BIG JIM" LEAD WEIGHT BELT— 8 LBS.
Includes:

Retail \$3.95

Cat. No. 1942
PROFESSIONAL LEAD WEIGHT BELT — 8 LBS.
Includes:
Cat. No. 1943-01 — 2 lb. "Sandwich" lead weights (four)
Cat. No. 1942-02 2" Professional web belt with a new Jet-O-Sen quick release safety buckle assembly that allows easy adjustment with a simple pull.
Retail \$10.95

Cat. No. 1942-02
PROFESSIONAL WEIGHT BELT
(2" web belt with Jet-O-Sen safety buckle assembly)
Retail \$2.95

Cat. No. 1942-04
JET-O-SEN 2" SAFETY BUCKLE ASSEMBLY
Stainless Steel — 2 pcs. (fits 2" to 2 1/8" web belts)
Retail \$1.75

Cat. No. 1943-01
2-LB. "SANDWICH" LEAD WEIGHT
(Fits 2" web belt)
Retail \$2.00

No. 1944-01
3-LB. "SANDWICH" LEAD WEIGHT
(Fits 2" web belt)
Retail \$3.00

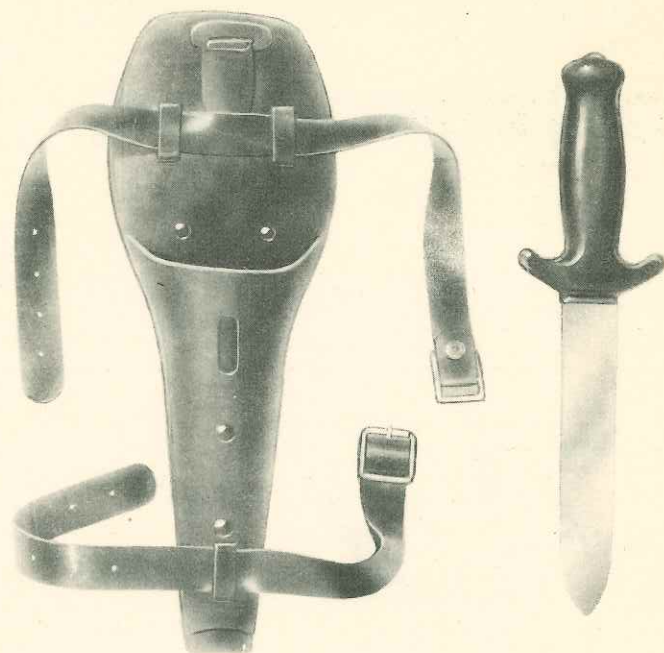

DIVING ACCESSORIES

Cat. No. 1985
ESPADON DELUXE
KNIFE AND SHEATH
Retail \$9.95

Cat. No. 1983
ESPADON DELUXE KNIFE ONLY
Retail \$6.50

Cat. No. 1984
ESPADON DELUXE SHEATH ONLY
Retail \$3.50

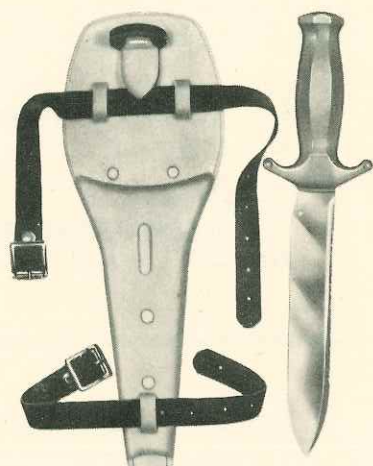

An extra heavy duty, exceptionally strong stainless steel knife with a Plastisol coated aluminum handle. Exclusive design of the sheath permits attaching to calf of the leg — the proper positioning for skin diving knives.

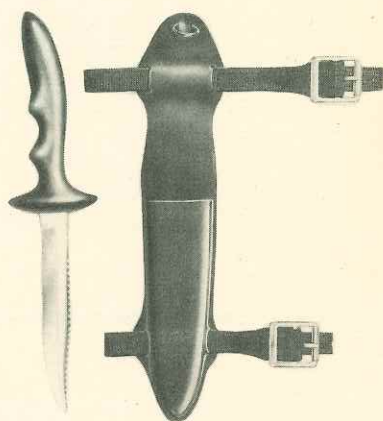

Cat. No. 1955
ESPADON KNIFE AND SHEATH
Retail \$8.95

Cat. No. 1953
ESPADON KNIFE ONLY
Retail \$5.95

Cat. No. 1954
ESPADON SHEATH ONLY
Retail \$3.00

Cat. No. 1990
"BIG JIM" Divers Knife
Retail \$4.95

Cat. No. 1951
"MAKO SHARK" UNDERWATER CAMERA
Retail \$19.95

The world's first popular priced amphibious still camera. This versatile camera allows surface as well as underwater photographs without adjustments or special housings. It has been used successfully up to depths of 100 feet. Made of durable black polyesterine, this camera will float when released underwater. (Uses standard 620 film roll, which gives 12, 2 1/4 x 2 1/4 pictures.)

Cat. No. 1986
UNDERWATER THERMOMETER
Retail \$3.95

Cat. No. 1945
AQUASTAR DELUXE
AUTOMATIC UNDERWATER WATCH
Retail \$79.95

A completely new watch designed especially for the diver with all these important features: Automatic self-winding, bezel moving dial to record diving time, calendar window, luminous markings, antimagnetic and the finest 17-jewel movement. One year guarantee. Imported from JeanRichard, Geneva, Switzerland.

Cat. No. 1946
AQUASTAR UNDERWATER WATCH
Retail \$34.50

A diver's watch from the world famous JeanRichard of Switzerland. 7-jewel stem-wound movement, luminous markings, antimagnetic. One year guarantee.

Cat. No. 1947
AQUASTARLET UNDERWATER WATCH
Retail \$49.95

The finest compact size watch with all these outstanding features: Calendar window, bezel moving dial to record diving time, luminous markings, antimagnetic and a superb 17-jewel movement. One year guarantee. Imported from JeanRichard, Switzerland.

Cat. No. 1956
200 FT. DIVERS DEPTH GAUGE
Retail \$8.95

Corrosion proof chrome plated brass housing, rubber encased with form-fitting wrist strap.

Cat. No. 1958
200 FT. DIVERS COMBINATION
COMPASS AND DEPTH GAUGE
Retail \$10.95

Corrosion proof chrome plated brass housing, rubber encased with form-fitting wrist strap.

Cat. No. 1964
SUBMARINE LIQUID COMPASS
Retail \$5.95

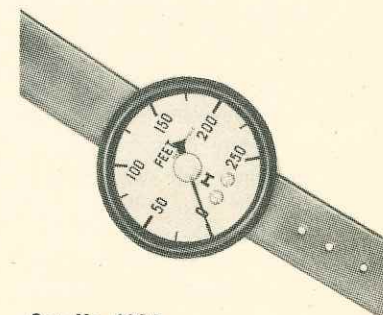

Cat. No. 1957
250 FT. AQUASTAR PROFESSIONAL
DEPTH GAUGE
Retail \$12.95

A precise divers gauge — heavy chrome plated brass. Curved wrist-fitting housing. Saltwater impervious strap.

Cat. No. 1959
250 FT. AQUASTAR PROFESSIONAL
COMPASS AND DEPTH GAUGE
COMBINATION
Retail \$14.95

A precise compass and depth gauge combination — heavy chrome plated brass. Curved wrist-fitting housing. Saltwater impervious strap.

Cat. No. 1994
DE SANCTIS DEPTH GAUGE —
"U.D.T." MODEL
Retail \$29.95

The only absolutely fool-proof depth gauge. Sealed in oil — accurate to 250 feet — all neoprene casing.

DIVING ACCESSORIES

DIVING SAFETY SECTION

The NAVIGATOR

This unique innovation concentrates all the diver's necessary instruments in one handy bracelet-like panel, plus providing a decompression table.

The panel consists of:

- Aquastar Deluxe Watch
- Aquastar Special 250 ft. Depth Gauge
- Compass
- Water Thermometer
- Decompression Table

Cat. No. 1979
NAVIGATOR
Retail \$150.00

Cat. No. 1988
SCUBA-VEST LIFE JACKET
Retail \$9.95

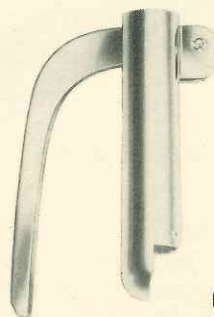

Designed by Jim Christiansen, one of America's foremost advocates of diving safety. Made of specially prepared material, the inside of which is completely saturated with a specially compounded leak-proof and corrosion proof heavy coating.

The Scuba-Vest is engineered to float an unconscious or resting diver in a "face up" position. Experience has shown that although the Scuba-Vest is primarily a safety device it can be utilized for that "long swim back to the boat."

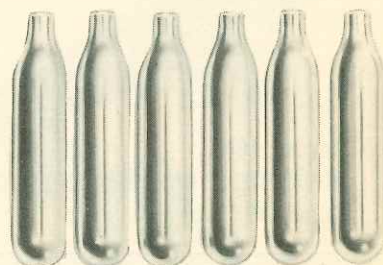

The Scuba-Vest is reversible. One side is professional black. The other side is officially approved International Orange, the most vivid of colors for diving safety. In an emergency, a diver wearing the black side out can easily reverse the Scuba-Vest to show the orange side for easy identification.

The Scuba-Vest is inflated by means of a "squeeze-grip" detonator containing an over-size, cadmium plated CO₂ cartridge. The re-usable detonator can be easily removed and a new CO₂ cartridge installed, ready for instant re-use.

Cat. No. 1988-02
DETONATOR
Retail \$3.00

CO₂ CARTRIDGES
(pkg. of 6)
Retail \$3.00

DIVING SAFETY SECTION

AUTOMATIC DECOMPRESSION METER

Cat. No. 1973
AUTOMATIC DECOMPRESSION METER
Retail \$49.95

Pat. Pending

A precision instrument that functions automatically just like an "electronic brain," continuously registering and retaining the memory of repetitive and multiple depth dives, calculating and indicating depth and time for decompression purposes appropriate for every dive. THE AUTOMATIC DECOMPRESSION METER duplicates your body functions and takes the guesswork out of planning your dives and establishing your decompression procedures. It eliminates the greatest worry factor and gives you the greatest safety factor in diving. THE AUTOMATIC DECOMPRESSION METER is unquestionably the greatest advance in diving safety since the Bert and Haldane Decompression Curves.

THE AUTOMATIC DECOMPRESSION METER is your infallible companion, who guides and protects you constantly by informing you when to stop to decompress, and when to start ascending.

THE AUTOMATIC DECOMPRESSION METER records the two essential elements for each dive-time and depth (pressure) - automatically calculates these two

factors, before and during each dive, and immediately indicates to you time to decompress.

The conventional decompression table gives you the values based upon a classic dive, where the diver remains at absolutely the same depth level. With THE AUTOMATIC DECOMPRESSION METER, however, the margin of error is taken out of the calculation of decompression time, because THE AUTOMATIC DECOMPRESSION METER reproduces the physiology of your body by duplicating the rate at which the nitrogen goes into and out of solution in the blood stream.

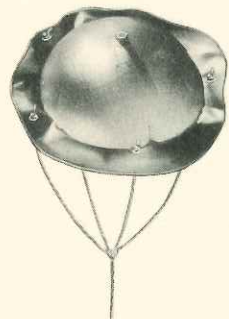

THE AUTOMATIC DECOMPRESSION METER keeps an exact record of the dive just completed and of the time you spend on the surface between dives, using the diving time as well as the surface time to automatically calculate and prescribe for you the decompression time necessary on your next dive. This process of memorizing continues for six hours after the last dive you make.

DIVING SAFETY SECTION

Cat. No. 1900
"AQUA-FLITE" FOAM SAFETY BELT
Retail \$5.95

For the water skier and sportsman. For the first time — a truly comfortable safety belt. Made of unsinkable, specially compounded rubber, a material that withstands the elements. Electronically sealed with special process, vinyl laminated, heavy duty cotton twill. 1" web belt is imbedded in foam.

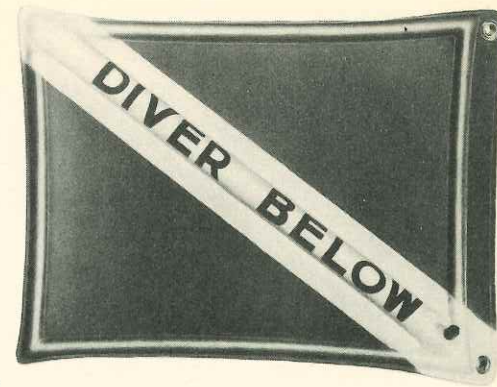

Cat. No. 1987
MARKER BOUY
Retail \$1.95

A unique, inflatable marker float. Can be used as a safety float in the pool or a marker for the boating enthusiast or skin diver.

SUBMARINES AND BOATS

SUBMARINES

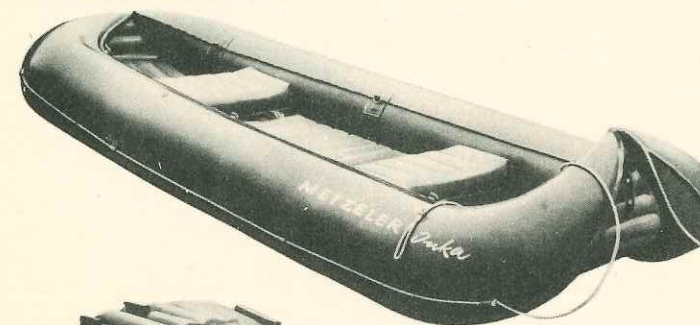

Cat. No. 1995
STANDARD SUBMARINE—SEA SHARK
Retail \$1,500.00

The ultimate in underwater transportation for the SCUBA diver. Developed after many years of research with a prototype, which made an underwater crossing from Los Angeles to Santa Catalina Island in six and one-half hours. The SEA SHARK and the NAUTILUS operate below the surface at a speed of 4 mph or on the surface at 6 mph. Constructed of high-impact fiberglass, 18 feet long with a 32 inch beam and weighing approximately 500 pounds. Propelled by an electric motor powered by specially constructed batteries, both submarines utilize an air-

Cat. No. 1996
DELUXE SUBMARINE—NAUTILUS
Retail \$2,500.00

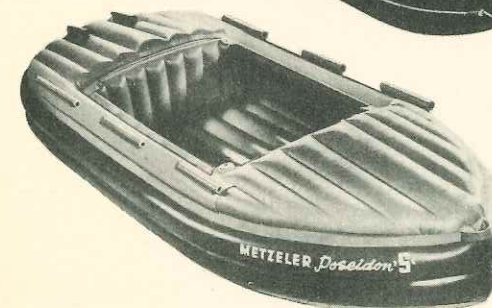

craft-type control stick. SEA SHARK Cat. No. 1995... Retail \$1,500.00. Cruising range — 2 hours, 2 speeds forward, 2 speeds reverse. Complete with depth meter and compass. NAUTILUS, Deluxe Cat. No. 1996... Retail \$2,500.00. Clear plexiglass canopy, cruising range — 4 hours. 2 speeds forward, 2 speeds reverse. Complete with depth meter, compass, 2 SCUBAIR diving units, and built in tanks. Both models are manufactured by C.O.S.M.O.S., Italy, and are available through all HEALTHWAYS dealers.

DIVING BOATS

Cat. No. 3212
THE INKA BOAT
Retail \$165.00

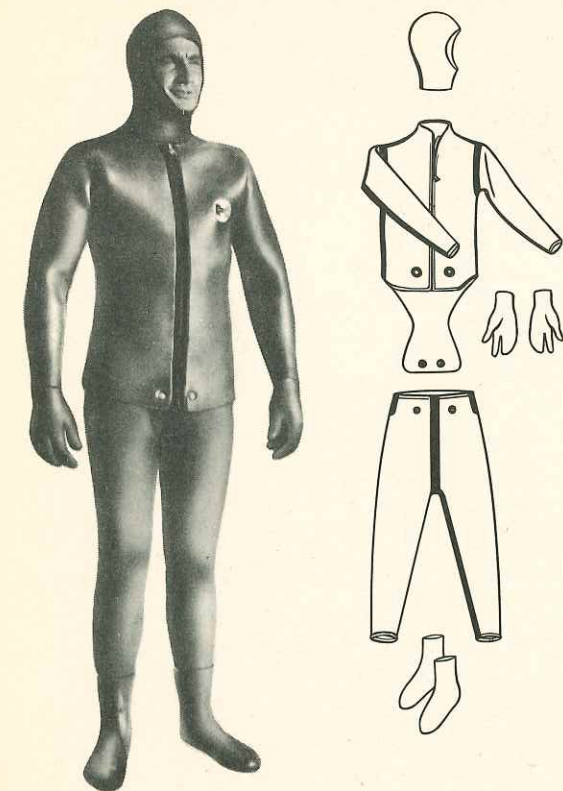

Extra heavy duty canvas, completely rubberized inside and out. The boat for the hunter, the skindiver or as a auxiliary boat for the yachtsman. Inflatable in minutes. Can be used with outboard motor. Folds into shoulder carrying bag.

Cat. No. 3214
THE POSEIDON SUPER BOAT
Retail \$175.00

Two or three seater. Extra heavy duty canvas, completely rubberized inside and out. The family and sports boat. Can be used with outboard motor. Inflatable in minutes. Folds into shoulder carrying bag.

UNDERWATER EXPOSURE SUITS

With your diving safety in mind, Healthways has attached an exclusive decompression chart on the arm of each Coronado Deluxe complete suit.

This chart gives you the maximum diving time at a given depth with no decompression and maximum diving time with decompression only at ten feet.

For prolonged dives at greater depths, we recommend Cat. No. 1973 Automatic Decompression Meter.

CORONADO DELUXE FOAM NEOPRENE SUIT

Made of 3/16" heavy duty, high stretch material—skin on two sides. (Includes hood, long shirt with supporter apron, exclusive butterfly-seal collar and long pants, gloves and boots. Exclusive new "Easy-to-put-on" design with full length new heavy duty, giant zipper on shirt front.

MASKS, FINS and SNORKEL REPLACEMENT PARTS

CAT. NO.	DESCRIPTION	RETAIL EACH
1201	Aqua Champ Special Mask	
1201-02	Styrene lens (clear)	.25
1201-03	Straps	.10
1201-04	Buckle	.10
1202	Aqua Champ Sr. Mask	
1202-02	Lens (shatterproof)	.25
1201-03	Straps	.10
1201-04	Buckle	.10
1205	Professional Mask (Blue)	
1205-02	Lens (Double Strength Glass)	.85
1205-03	Strap	.65
1205-04	Buckles	.06
1205-60	Band Complete	.65
1211	Professional Deluxe Mask	
1205-02	Lens (double strength glass)	.85
1211-03	Strap	.65
1205-04	Buckles	.06
1205-60	Band complete	.65
1212	Professional Deluxe Mask (Natural)	
1206-02	Lens (Tempered Glass) — Safety	1.25
1212-03	Strap	.65
1205-04	Buckles	.05
1205-60	Band Assembly Complete	.65
1220 1250	1270 Espadon	
1222 1252	1272 Panoramique	
1223 1253	1273 Compensator	
	-02 Lens - Tempered Safety Glass	1.25
	-03 Strap	.80
	-04 Buckles for Strap	.10
	-60 Band Assembly Complete	.65
1224	Panoramique Mask with "Clear-Ease" Valve	
1261-02	Lens (tempered safety glass)	1.80
1222-03	Strap	.80
1222-04	Buckles for strap	.10
1222-60	Band assembly complete	.65
1261-06	One-way Valve	.25
1225	Squale Mask	
1225-02	Lens (tempered safety glass)	1.25
1225-03	Strap	.80
1225-04	Buckles	.10
1225-60	Band assembly complete	.65
1226	Squale Mask with "Clear-Ease" Valve	
1261-02	Lens (tempered safety glass)	1.80
1225-03	Strap	.80
1225-04	Buckles	.10
1225-60	Band assembly complete	.65
1261-06	One-way Valve	.25
1239	Ostrica Junior Mask	
1239-02	Lens (Tempered Safety Glass)	1.25
1239-03	Strap	.65
1239-04	Buckles for Strap	.10
1240	Ostrica Bantam	
1240-02	Lens (Tempered Safety Glass)	1.25
1240-03	Strap	.50
1240-04	Buckles for Strap	.10
1243	Pinocchio Professional "Model 1962" Mask	
1243-02	Lens (tempered Glass)	2.50
1243-03	Strap	.85
1243-04	Brass Buckle	.10
1243-05	Stainless Steel Band Assembly	3.50
1243-06	Clamp	.25

CAT. NO.	DESCRIPTION	RETAIL EACH
1244	Pinocchio "Clear-Ease" Mask	
1243-02	Lens (tempered safety glass)	2.50
1243-03	Strap	.85
1243-04	Brass buckle	.10
1243-05	Stainless steel band assembly	3.50
1243-06	Clamp	.25
1243-07	One-way Valve	2.00
1261	Stabilizator Clear-Ease Mark	
1261-02	Lens (Tempered Glass)	1.80
1260-03	Strap	.80
1220-04	Buckles	.10
1222-60	Band Assembly Complete	.65
1261-06	One-way Valve	.25
1302	Water Dogs — Small	
1302-03	Strap	.28
1205-04	Buckles	.10
1303	Water Dogs — Medium	
1303-03	Strap	.38
1303-04	Buckles	.10
1304	Water Dogs — Large	
1303-03	Strap	.38
1303-04	Buckles	.10
1334	Genoa Fin — Large (9-11)	
1334-03	Strap	.65
1334-04	Buckle	.10
1335	Genoa Fin — X Large (11-13)	
1335-03	Strap	.65
1357-04	Buckle	.10
1381	Rondine Adjustable Fins — Small (1-5)	
1381-03	Strap	.50
1381-04	Buckle	.15
1382	Rondine Adjustable Fins — Medium (5-10)	
1382-03	Strap	.50
1381-04	Buckle	.15
1383	Rondine Adjustable Fins — Large (10-14)	
1383-03	Strap	.50
1381-04	Buckle	.15
	Super Rondine Fins	
1390-08	Hinged Flap	3.00
1390-09	Flap Pin	.50
1403	Sea Scout Snorkel	
1403-03	Mouthpiece	.25
1405	Sea Dive Standard Snorkel	
1403-03	Mouthpiece	.25
1403-02	Cage	.30
1403-04	Ball	.10
1430	Delfino Snorkel	
1430-07	Mouthpiece	1.30
1430-11	Gum Rubber Tube	.38
1430-05	Plastic Tube	.30
1432	Haiti Professional Snorkel	
1432-07	Mouthpiece	1.00
1432-01	Tube	1.25
1433	Delfino Caribe Snorkel	
1430-07	Mouthpiece	1.50
1433-06	Plastic Pipe	.50
1432-07	Professional Snorkel Mouthpiece	1.00
1938	SNORKEL HOLDER	1.00
	Fits all Healthways Snorkels	
1962-01	PRESCRIPTION LENS HOLDER FRAME	3.50
1962-02	PRESCRIPTION LENS HOLDER SUCTION CUP	1.00

RESEARCH AND DEVELOPMENT

Gustav Dalla Valle

Gustav Dalla Valle, Director of Healthways Diving Research and Development Division, is a world-famous diver and underwater pioneer. Because of a compelling feeling of responsibility toward every fellow diver, he personally tests, under the most trying conditions, every item manufactured under his control. A wealth of underwater experiences in all the waters of the world and his ingenuity have been the foundation for his success in bringing to divers everywhere the safest, most advanced and most practical equipment in existence.

His life has always been devoted to the promotion of the diving sport. He is greatly responsible for introducing diving on a popular basis to the United States by presenting to the American market the first full-foot fin, the Cressi Rondine, which today is the most popular fin in the world.

Dalla Valle's international reputation and his renown as one of the outstanding pioneers and developers in the underwater field have earned the respect and the cooperation of the world's most outstanding underwater scientists.

Healthways Research and Development Division, under Dalla Valle's guidance and with the cooperation of the world's leading underwater scientists, assures that every Healthways product is the most advanced and the finest available.

Richard E. Anderson

Richard Anderson graduated from the Sparling School of Deep Sea Diving in 1953. Because of his mechanical background, he immediately became interested in the design and development of underwater equipment. He was one of the first diving mechanical engineers in the United States who was engaged in the study and development of SCUBA apparatus.

In 1954 Richard Anderson joined Healthways Research and Development Division and has since added his experience and ability to produce the world's finest line of regulators. His development of the Scubair regulators has been an important contribution to the safety and advancement of the underwater sport.

David R. Denis, B.S.M.E.

Mr. Denis is in charge of all engineering activities and of manufacturing and production control at Healthways. A mechanical engineer and graduate of the University of Florida, he was formerly a member of the Research Division of Standard Oil of New Jersey. His scientific contribution in the development of new products has made Healthways products the best-engineered in the world.

Jim Christiansen

Jim Christiansen, the most famous and respected American diver, is one of the foremost advocates of diving safety education. He is the developer of Healthways SCUBA-VEST. Experts agree that the SCUBA-VEST is the greatest contribution to diving safety made in many years. He was USA National Spearfishing Champion in 1956 and 1957, and Athlete of the Year in 1957. He has been Coach of the American National Spearfishing Team since 1957, and is now a full-fledged member of Healthways Research and Development Division.

Ellis R. Cross

Master Diver E. R. Cross is a former Naval officer and former owner of the world-famous Sparling School of Deep Sea Diving. Cross was on the staff of the Commander of the Ship Salvage Unit at Bikini during the atom bomb tests. He was a delegate to the Conference for National Cooperation in Aquatics at Yale University, on Underwater Safety.

Cross is the author of Healthways "UNDERWATER SAFETY," and several technical diving books specializing in the psychology of diving, diving diseases, diving physics and diving equipment. His contributions of equipment and diving safety through the Healthways Research and Development organization are of great consequence.

Egidio Cressi

Director General of Cressi-sub in Genoa, Italy, and a pioneer of the diving sport, Mr. Cressi is one of the first manufacturers of diving equipment. He is world-famous for his continued contribution to the underwater sport by developing new and safer products. Cressi products are known as the most advanced professional diving equipment available.

Victor DeSanctis

Mr. DeSanctis, after many years of scientific research, produced the absolute diving safety device, THE AUTOMATIC DECOMPRESSION METER. Through this invention, Mr. DeSanctis will be honored as one of the greatest benefactors of diving safety. In collaboration with Healthways, he continues to research the science of decompression.

Pucciarini

Mr. Pucciarini's fame in the underwater world was first established as a member of the Italian Underwater Demolition Team, during the Second World War, when he helped create the one-man and two-man submarine. Mr. Pucciarini has developed two- and four-man submarines for the United States and Allied Navies. In collaboration with the Healthways Research and Development Division, he has developed the SEA SHARK and NAUTILUS.

Luigi Ferrari

Professor Ferrari, an associate of Egidio Cressi and Director of the Research Department of Cressi-sub in Genoa, Italy, is recognized the world over as the greatest authority on underwater propulsion. His Rondine fin design and principles have set the pace in fin development. The Super Rondine Fins are the latest creation by Professor Ferrari, in collaboration with the Healthways Research and Development Division.
